

Solární sprcha – pro použití k zahradním bazénům

suntherm
SOLARSHOWER

Simply set up and connect to garden hose

The hot water in your garden shower is heated free of cost by the largest boiler in the universe: the sun. Relax after sports or working in the garden with a pleasantly warm shower out in the open. It's a luxury you soon won't want to do without.

Simpler and quicker to set up than many deck chairs

Bolt the foot of the shower to a base or flagstone, three screws and fasteners are supplied with the shower. Or you can simply fix the shower in your lawn with the spike that is available separately. Your garden shower is now ready to use wherever your garden hose reaches: comfortably next to your patio or near the pool. The large, chrome-plated swivel shower head is closely perforated. The sun takes care of the rest. You don't even need to install any plumbing.

This practical Base for mounting is available at extra cost. Hammer the base into the ground and secure the shower with the 3 screws. Simple!

Advanced solar technology ensures warm water up to 50°C

The cold water from your garden hose is heated in the 20 litre HDPE tank. A full tank is sufficient for about 5 showers - enough for the entire family. Depending on sun intensity, the first warm shower can be ready within half an hour of filling. The attractively designed fixtures allow you mix the hot water from the tank with the cold water from the hose till the water temperature is to your liking. Just as in your bath - except that you are now out in your garden. In the cold season, simply drain the water from the tank. The shower can easily be left out in the open during winter.

Shown for the first time at the «Inventors Exhibition» in Geneva

The principle of the solar-heated shower is so simple, yet so effective that it was recognised as an outstanding invention. Suitable for water pressure between 2 and 4 bar. Maximum water flow: 5 - 6 litres / min. The shower has a height of 235 cm and weighs 12 kg. Do you still remember the last warm summer showers? If you wish, you can now enjoy one every day.
